

PANORAMIC POWER

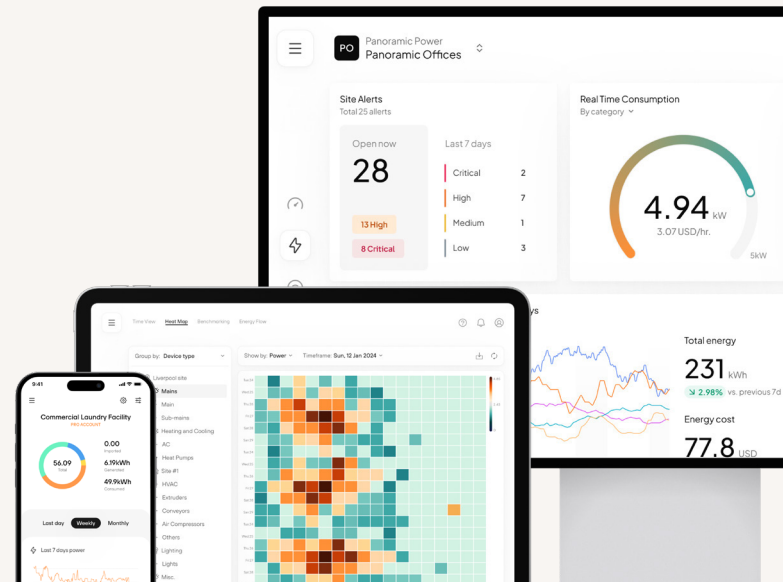

ENERGY INTELLIGENCE SOLUTION

CUSTOMIZED TO YOUR WORK, AND YOU.

Gain unparalleled visibility into your entire energy estate. Wireless and self-powered sensors capture and transmit energy data from all devices to a cloud platform that also integrates with external energy and production sources.

Reap the rewards of a powerful combination of customized dashboards, a sophisticated trigger and customization engine, and real-time alerts and insights, to optimize your energy consumption, improve efficiency and operations, and achieve your sustainability goals.

FASTEST TIME-TO-VALUE

Easy, accessible and no-downtime deployment, gives you instant access to energy data.

Energy cost savings

Identify energy inefficiencies to eliminate waste and reduce cost.

Enhanced Operational Efficiency

Proactively drive productivity with predictive maintenance.

Hit Sustainability Targets

Automatically monitor and report on sustainability success metrics.

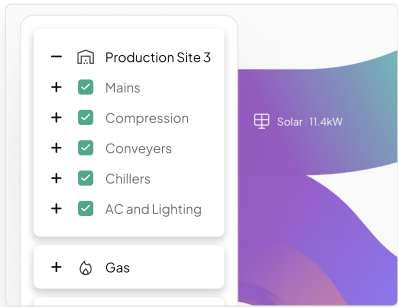

Data-driven Strategic Planning

Make informed decisions, validate investments, and mitigate risks.

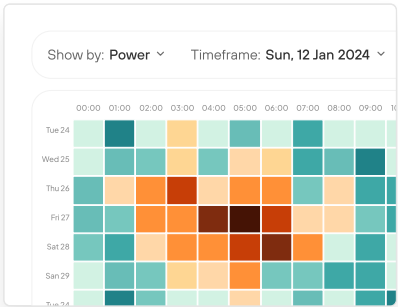

UNPARALLELED
INSIGHTS
DELIVERED
SIMPLY AND
QUICKLY

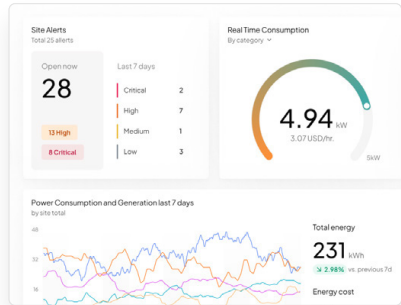

Customized Energy Mapping

Our platform collects data from our sensors and third-party sources, allowing you to group, analyze, and visualize it in any combination, driving efficiency and operations.

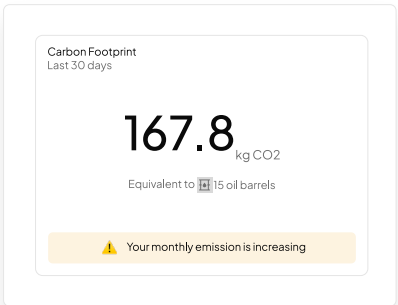

Data Visualization

The data is transmitted to our cloud analytics platform, where instant, real-time and clear visualization of your energy consumption is continuously presented.

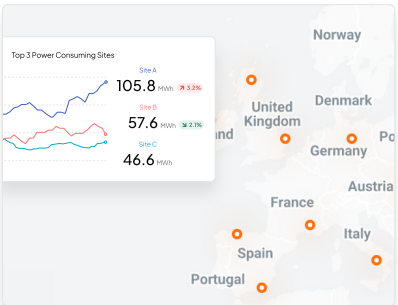

Personalized Benchmarking
and Alerts

Create tailored dashboards that enable each team member to devise, track and monitor their specific goals and KPIs. Trigger alerts to allow for quick responses and proactive maintenance.

Data-Driven
Decision-Making

Use data-based insights to identify inefficiencies, implement cost-saving measures, and optimize your operations and sustainability investments

Multi-Site
Management

Monitor and compare energy optimization and health across multiple sites on one unified dashboard, allowing for standardized, efficient management company-wide.

YOUR CUSTOMIZED
ENERGY INTELLIGENCE JOURNEY

Through our accredited partner network, Panoramic Power empowers you to transform energy management, boost operational efficiency, and achieve your decarbonization goals.

With seamless access to real-time energy data anytime, anywhere, you can make informed decisions that drive meaningful business outcomes.
